

<p>Network Standard Advice No. 1866 26/10/2015 Doc. Ref. Network Standard NS112 Amdt1</p>

TO: Customers, Service Providers and Ausgrid Staff.

Amendments to Network Standard NS112, Design Standards for Industrial and Commercial Developments

Summary

This Network Standard was converted to BMS format in April 2015 and has now been revised to include all the current BMS formatting requirements.

These include:

1. Modification to two clauses (7.4.2.1 and 8.1.2) concerning location of sites for kiosk substations. These changes are highlighted in grey.
2. Removal of references to NUS network standards, these are now identified simply as NS network standards.
3. Extending the list of referenced documents.
4. Validation of references to other Ausgrid documents following BMS conversion of these documents
5. Validating references to external agencies and associated documentation.
6. Updates to the sample compliance checklist.
7. Numerous other formatting changes within the document.

The existing review date has been retained.

Note: Current network standards, with NSAs and CIAs, are available on Ausgrid's Internet site at www.ausgrid.com.au.
