

# Role Statement

<b>Role Title:</b>	<b>Network Modernisation Analyst</b>	<b>Level:</b>	<b>PM&amp;S 2</b>
<b>Status:</b>	Individual Contributor		
<b>Role Purpose:</b>	<p>To support the enhancement of network Ausgrid's asset investment strategy by analysing and understanding the changing nature of our network's needs as our customer's needs change, in order to identify how the types of investments required to meet those needs are also changing.</p> <p>The role will identify and put forward future network investment directions which match the changing reliability, safety and sustainability needs of our customers and shareholders. It will balance those against the need to manage legacy obligations related to the existing asset base.</p>		

## Minimum Role Accountabilities:

**Context:** *Dimensions relevant to this role*

Influence/Impact	Key stakeholder engagement and conflict resolution
Leading & Developing	Experienced technical or professional leader contributing to long term workforce planning
Difficulty	Implementing significant operational plan or change and resolving complex problems across multiple employees or cross functional activities
Planning Focus	Operational planning or long term program planning for area of accountability
Direction	Broad direction and guidance from senior management

**Accountabilities:** *What I may be expected to do when I come to work in this role:*

- Maintain a clear and up to date view of customer needs and Ausgrid's corporate direction relating to the provision of distribution network services. This includes actively monitoring national and international trends and policies in use and assets and services used for the provision of distribution network services.
- Carry out structured analytical reviews of customer, network and/or asset data to identify trends related to changing needs for network investment and to support optimisation of proposed modernisation strategies.
- Support the Asset Management division in providing input into corporate direction setting and planning as appropriate to this area.
- Co-ordinate the development of a network modernisation strategy and associated material in support of its implementation.
- Develop proposals that consider the future direction/types of network investment.
- Co-ordinate with staff across Ausgrid to ensure network modernisation strategies and initiatives are integrated and managed appropriately, including into governance frameworks.
- Lead the maintenance of up to date knowledge of current and emerging electricity network asset investment alternatives.
- Lead the investigation of emerging network asset investment models/paradigm's which support the network modernisation strategy.
- Prepare reports and/or presentations to share insights and lessons learned across Ausgrid.
- Provide leadership in embedding knowledge management related to network modernisation across the organisation.
- Compliance with safety requirements and ongoing improvements in safety culture and performance, both personally and for subordinate staff and external contractors.
- Perform other duties and responsibilities as may be directed by your manager, in line with the Work level standards for this role.
