

Review of Environmental Factors submission form

Matrville to Maroubra cable project

Ausgrid is planning to install a new 132,000 volt underground cable between Matrville to Maroubra to replace existing cables that are nearing the end of their service life.

The project is part of a program to retire fluid filled cables across our network.

Further details are available on the project webpage, www.ausgrid.com.au/matravilletomaroubra and in the Review of Environmental Factors (**REF**) which can be viewed on the project webpage.

The REF will be on display until Monday, 5th of April 2021 and Ausgrid encourages further comments on the proposal at this stage.

Feedback

Do you support Ausgrid's plans to install a new underground cable between Matrville to Maroubra?

- Yes
- No
- Yes, with comments given in the feedback section overleaf
- No, with comments given in the feedback section overleaf
- Don't have an opinion – but wish to provide comments for consideration in the feedback section overleaf
