

Review of Environmental Factors submission form

Picnic Point to Revesby cable project

Ausgrid is planning to replace 132,000 volt underground cables between Picnic Point and Revesby so we can maintain a reliable electricity supply.

The project is part of a program to retire fluid filled cables across our network.

Further details are available on the project web page - www.ausgrid.com.au/picnicpointrevesby and in the Review of Environmental Factors (REF) which can be viewed on the project web page.

The REF will be on display until Friday 28 September 2018 and Ausgrid encourages comments on the proposal at this stage.

Feedback

Do you support Ausgrid's plans to replace existing cables between Picnic Point and Revesby?

Yes No

Yes - with comments given in the feedback section below

No - with comments given in the feedback section below

Don't have an opinion - but wish to provide comments for consideration (given in the feedback section below)

Do you have comments on the REF?

Do you have comments on the project overall?

More comments can be provided over the page.
