Notes:

- 1) All Rates in the above tables are exclusive of GST.
- 2) Assets in *italics* are no longer offered for new or replacement installations.
- 3) BILLING - The above tariffs are billed monthly by Ausgrid
- 4) AER APPROVAL - The above tariffs have been approved by the AER and full details of the pricing submission and AER approval can be found at:  
<https://www.aer.gov.au/industry/networks/pricing-proposals/ausgrid-2024-25-pricing-proposal>
- 5) TARIFF TYPES - Tariff types for each street lighting asset can be found on Ausgrid bills and Ausgrid street lighting inventories. Consistent with its submissions to the AER, Ausgrid uses the following tariff definitions:

**Rate 1** is the rate for public lighting installations with all components funded by Ausgrid.

**Rate 2** is the rate for public lighting installations which are gifted to Ausgrid where customer or developer funded the assets.

**Rate 3 (obsolete)** applied to legacy lighting installations where the customer or developer funded and maintains the asset.

**Rate 4** is the rate for situations where the council has asked Ausgrid to fund the replacement of a luminaire where the old luminaire were previously funded by the council as Rate 2 assets.

**Rate 5** is the rate for situations where the council funds the replacement of a luminaire where Ausgrid previously funded the old luminaire as Rate 1 assets.

- 6) REMAINING CAPITAL VALUE (RESIDUAL VALUE) - Ausgrid charges customers or third parties for the remaining capital value if they request the removal of assets before their economic lives end. For assets acquired prior to 1st July 2009, customers should request the remaining capital value from Ausgrid. These values are calculated using an AER-approved model, which incorporates a declining rate for each regulatory period.

For assets acquired on or after 1st July 2009, the remaining capital value is calculated based on the asset's remaining life, the annuity charge, and the discount rate approved by the AER.

- 7) Prices displayed in Tables above are for assets installed Post 30 June 2009. Assets Pre 1 July 2009 are charged at a separate price structure determined by AER. More information on price structures can be found in Ausgrids Public Lighting Management Plan. Link below:
