

Network Standard
Advice No. 2023 - 23/10/2020
Doc. Ref. Network Standard NS211 – Amdt 2

TO: Customers, Accredited Service Providers and Ausgrid Staff.

Amending Network Standard NS211 Working with Asbestos

Summary:

The purpose of this document is to provide the minimum requirements for working in close proximity to, or disturbing and/or removing, Asbestos Containing Materials (ACM) from the workplace.

This document applies to all Ausgrid staff, ASP's and contractors, when working on, or in close proximity to, asbestos-containing materials. This includes all electrical network assets and non-network areas including office/depot facilities. When Ausgrid staff are working at non Ausgrid sites, the general requirements of this Network Standard are still to be applied.

The document has undergone minor amendments of its content and contains the following amendments:

- Section 1.0 – Purpose
- Section 2.0 - Scope
- Section 3.0 – References
- Section 4.0 – Definitions
- Section 5.0 – General
- Section 6.0 – Work Procedures General
- Section 10.0 – Compliance to Network Standards

Other minor changes have been made, other than those itemised. Refer to grey shading in the document for details of modifications.

The document review date has been retained at 13/05/2023.

NSs, NSAs and other technical documents are available on Balin.

James Hart

Acting – Head of Asset Engineering Policy & Standards
