

Geographic Information System (GIS)

20 May 2013

Dear ASP3,

GIS access

Ausgrid is pleased to announce we will be providing you with the option to access our Geographic Information System (GIS).

Establish user account

To enable us to provide you with access to our GIS you will need to establish a user account with Ausgrid for each individual ASP/3 designer who requires access. This will allow us to establish and manage a user client database for those ASP3 designers wishing to use this service.

What you need to do now

Could you please forward a list of your designer's names and their individual company email addresses to contestability@ausgrid.com.au and include "GIS Access for ASP3" as the subject matter heading.

Further information

Information on how to gain access and use this new design tool will be covered at the ASP3 seminar on 25 June 2013 at Ausgrid's Silverwater Learning Centre.

What if you miss the seminar

For those not able to attend the seminar, we will include all the relevant information on Ausgrid's web site.

Regards,

Matthew Hindson
Manager Contestability - Ausgrid
