

<p>Network Standard Advice No. 1917 25/10/2016 Doc. Ref. Network Standard NS109 Amdt 4</p>
--

TO: Customers, Service Providers and Ausgrid Staff.

Amending NS109 Design Standards for Overhead Supply Developments and Distribution Centres

Summary

The purpose of this Network Standard outlines the installation requirements for the provision of distribution centres and the electricity reticulation systems in overhead supplied developments.

Installations must comply with the requirements of this Network Standard and all design and construction standards and specifications referenced in this document or issued by Ausgrid.

The document has undergone a full review of its content. Minor changes were made, including the following general updates:

- Updates to reference list
- Annexure A Table 3 (Option No.10 & 11).

Other minor changes have been made, other than those itemised. Refer to grey shading in the document for details of modifications.

The document review date has been updated to 17/10/2019.

NSs, NSAs and other technical documents are available on Balin.
